A Beginner's Guide to
Unified Communications

Educational eBook Series

How well does your team communicate?

The new normal of work includes an ever-changing mix of corporate offices, remote workplaces and mobile requirements. Progressive organizations realize that a fragmented combination of voice, video and text communication platforms puts their people and their business at a disadvantage.

Ad hoc and piecemeal technology purchases result in compatibility issues, frustration with creating workarounds and dealing with multiple vendors, increased costs, and stifled productivity. Legacy systems make it difficult to integrate cross platform communication and are often expensive to maintain.

WHAT IS UNIFIED COMMUNICATIONS-AS-A-SERVICE?

Unified Communications as a Service, or UCaaS, is a cloud-focused solution that combines your core communication mediums into one high-performance, cost-effective solution. This includes the integration of traditional phone systems, voicemail, call routing, video conferencing and text messaging into one integrated environment. The result – improved productivity, user simplicity, better call quality and cost savings for today's hybrid work environment.

Stats & Facts

56% lower total cost of ownership is achieved with single-provider UC solutions.

Metrigy Report

88% of leaders and **63%** of employees wish they had better tools to communicate effectively.

Harris/Grammarly Poll

48% of employees will work remotely at least some of the time in the post-pandemic world.
